

# Ognjen Puric

## Full Stack Web Developer

✉ opuric94@gmail.com    linkedin.com/in/ognjen-puric-b8a020351

### Profile

---

A highly skilled Full Stack Developer with expertise in Laravel, Vue.js, and the MERN stack, specializing in building scalable, high-performance web applications. With over 5 years of experience, I have a proven track record of delivering robust backend architectures and dynamic, user-friendly frontends that enhance business operations and user engagement.

I design, develop, and optimize end-to-end web solutions, leveraging Laravel for secure and efficient backend development, Vue.js for seamless frontend experiences, and MERN for full-stack JavaScript applications. My work focuses on clean code, best practices, and performance optimization, ensuring reliability and maintainability. My contributions matter because I create fast, scalable, and user-centric applications that drive business growth, streamline workflows, and enhance digital experiences. By integrating modern technologies, APIs, and DevOps practices, I help companies innovate, improve efficiency, and stay ahead in a competitive digital landscape.

### Professional Experience

---

#### Full Stack Developer, *FluentStream*

02/2022 – 11/2024 | Belgrade, Serbia

Built RESTful APIs and GraphQL services using Laravel (PHP) and Node.js/Express.js for scalable backend solutions.

Developed dynamic frontends with Vue.js and React.js (MERN), ensuring smooth user experiences and optimized performance.

Designed and optimized relational (PostgreSQL with Sequelize ORM) and NoSQL (MongoDB) databases for structured and unstructured data handling.

Implemented web scraping techniques using Puppeteer, Playwright, and Cheerio to extract and preprocess data for AI-powered projects.

Integrated Redis for caching and real-time data processing, reducing database load and improving system performance.

Containerized applications with Docker, ensuring consistency across development and production environments.

Styled modern UI components using Vuetify (Material Design) and Tailwind CSS for efficient and responsive design.

Implemented Git version control, using best practices like GitFlow for team collaboration and CI/CD pipelines.

Automated UI testing with Cypress, ensuring application stability and catching regressions early in the development cycle.

Automated deployments using DevOps best practices, configuring cloud services and managing server infrastructure.

Worked on MERN stack projects, developing end-to-end web applications with MongoDB, Express.js, React.js, and Node.js.

#### Junior Frontend Developer, *Team Sava*

05/2017 – 02/2022 | Belgrade, Serbia

Spearheaded the development of a customer dashboard using Vue 3 and Pinia, improving performance and reducing API call latency through Axios optimizations.

Integrated complex RESTful and GraphQL APIs to streamline communication with backend services.

Collaborated with DevOps teams to containerize frontend environments using Docker and managed deployments through CI/CD pipelines.

Led code reviews and implemented Git workflows (feature branches, pull requests), improving collaboration across multiple teams.

Worked closely with designers to develop a responsive, pixel-perfect UI using TailwindCSS and SASS.

Built and maintained React-based web applications for e-commerce and enterprise portals, leveraging Redux for state management and React Router for seamless navigation.

Developed reusable components and optimized rendering performance through memoization and React Hooks.

Integrated third-party APIs (payment gateways, analytics) and ensured OAuth2-based authentication for secure access.

Automated build and deployment pipelines with Docker and GitLab CI, reducing manual deployment time.

Collaborated with backend teams to ensure smooth API communication and handle real-time updates via WebSockets.

## Skills

---

<b>Language</b> Javascript/Typescript, Python, PHP	<b>Frontend</b> React.js, Redux, React Native, Vue.js, Vuex, Vuetify, Next.js, Django
<b>Backend</b> Node.js, Express.js, Django, Laravel	<b>Database</b> MySQL, PostgreSQL, MongoDB, DynamoDB, Redis
<b>Tools</b> Docker, Kubernet, Git, Jira, Figma, Webpack, ESLint, Babel, AWS	

## Education

---

<b>Bachelor's Degree in Computer Science, Singidunum University</b>	Belgrade, Serbia
---	------------------
